Content	<p>This program places students in paid internships in Science and Engineering at any of several Department of Energy facilities. Many of the participants in the program have decided on a career in science and engineering because of the nature of the experience. Students work with scientists or engineers on projects related to the laboratories' research programs. The different laboratories each offer different research opportunities. The summer programs at the various laboratories run from late May to mid-August, fall programs run from August through December and spring programs from January through May. The exact start dates depend on the laboratory and will be given to participants who have been accepted at that specific laboratory. Students are required to participate for the full term of the program. List of laboratories: http://www.scied.science.doe.gov/scied/erulf/choose.html</p>		
Outcomes	The purpose of the program is to encourage students to pursue a career in science and engineering.
