Content	<p>The Mathematics Summer Employment Program runs from the end of May through the middle of August and is open to students majoring in Mathematics. Computer Science majors with either a minor in math or a strong math curriculum may also apply. These programs afford the opportunity to "earn while you learn" by providing hands-on experience during a 12-week paid work assignment. Assignments are based on the student's experience and academic status. These intense 12-week programs give the brightest math students in America's colleges and universities the chance to put their problem-solving skills to the test and receive valuable work experience at the same time. Students participating in the programs have the opportunity to learn and develop cryptomathematical theory and to apply the theory to operational problems.</p>		
Outcomes	<p>As an MSEP participant, you will develop a deep understanding of the vital role that mathematics plays in assisting NSA tackle a diverse set of technical challenges. You'll also experience firsthand the excitement of working on mathematics problems of national importance. If you possess imagination, initiative, and intellectual curiosity, apply for the MSEP.</p>
